Reader’s Advisory

The Getty Research Institute has just added more than 77,000 high-resolution images to the Open Content Program from two of its most often-used collections. The largest part of the new open content release—more than 72,000 photographs—comes from the collection Foto Arte Minore: Max Hutzel photographs of art and architecture in Italy. Foto Arte Minore represents the life’s work of photographer and scholar Max Hutzel (1911–1988), who photographed the art and architecture of Italy for 30 years.

The Art Libraries Society of North America has launched the first issue of its newest publication, Multimedia & Technology Reviews (M&T Reviews), an e-publication freely available on the ARLIS/NA website. M&T Reviews targets projects, products, events, and issues within the broad realm of multimedia and technology as they pertain to arts scholarship, research, and librarianship. While assessing current products and projects, these reviews are also designed to engage readers in a conversation about how technologies and multimedia are being or can be deployed within our profession and by our constituents. The issues are published bi-monthly, alternating with the publication schedule of the ARLIS/NA Reviews. Architecture and architecture history faculty and independent scholars will find both of these publications useful to their endeavors.
