

Thank you for your interest in the SAH Data Project's Institutional Survey.

You are welcome to use this PDF to gather the information you will need before sitting down at the computer to complete the survey online. When you are ready, here is the link for submitting your institutional data:

### **SAH Data Project Institutional Survey**

Feel free to reach out to the project's researcher, Sarah M. Dreller, if you have any questions along the way: sdreller@sah.org

#### A Welcome Message from the Principal Investigators

First, thank you for taking this important survey. Its results will become a benchmark for subsequent SAH studies and policy recommendations by a range of organizations. This is an opportunity to gain a voice in articulating critical issues in our field. Your participation is critical.

In an effort to be as inclusive as possible, your answers will be collated along with those of students, faculty and administrators at a wide range of institutions in the United States—from community and junior colleges to the lvies; from professional programs to liberal arts colleges—to create the most comprehensive overview of the state of architectural history education in our time. SAH believes that knowledge regarding the physical organization of society is a vital aspect of a citizenry's ability to make informed decisions about the public realm. These questions are of the utmost importance to our members, affiliates, and all those engaged in teaching and scholarship regarding the built environment, especially at a moment of great social change. By completing this survey, you ensure that your experience and insights are recorded, and help to guarantee that the final report will be broad, inclusive, useful to you in your own work, and beneficial in ways that we might not even realize yet.

#### Before you start:

- For the purposes of this project, "architectural history" is broadly defined to include the history of interiors, architecture, landscape architecture, urbanism, and the cultural landscape.
- SAH has created a PDF of the questions in this survey (e.g., enrollment data, demographics, etc.) to help you gather statistics prior to opening the survey online.
- We do ask for the name of your institution, but only to ensure that the final data set will not include multiple responses from any one program. The analysis from this survey will *not* link data points to particular institutions. In the event that the final report mentions any institution by name, the data will have come from publicly accessible non-survey data, not from this survey.
- It will take you approximately 35-45 minutes to complete the survey.
- If you need to stop at some point, the survey will save the data you've already entered as long as you return to it on the same device.
- Please enter actual enrollment data for as many academic years as possible. Informed estimates are welcome when actual data are not available. Please leave boxes blank for academic years in which you have neither actual data nor informed estimates.
- Please fill out the comment boxes even when the questions don't seem directly relevant to you; data about the unique aspects of your program may be valuable in unforeseen ways.

The SAH Data Project has developed two related surveys —one for <u>students</u> and the other for <u>faculty</u>—so please share these links with colleagues at your institution and elsewhere. And if you also teach architectural history, please consider taking the faculty survey in addition to this one.

Thank you for investing your time to help shape the future of architectural history.

Sandy Isenstadt

Pauline Saliga

#### SURVEY ELIGIBILITY

\* 1. Can you provide information on enrollment and hiring trends over time, by virtue of institutional memory or access to departmental records at institutions *in the United States*?

- Yes. I would like to begin the survey.
  - No. Please tell me about other survey options.

#### **INSTRUCTIONS UPDATE - APRIL 2020**

#### Instructions Update - April 2020

The SAH Data Project team understands you are completing this survey during the COVID-19 pandemic when many are working from home. We ask that you just do the best you can within the context of your own current situation and, if desired, use the survey's many short-answer comment boxes to elaborate on how your answers might have been different during a typical spring term. We expect this information will be especially valuable in helping illuminate areas of the field that are thriving and areas where intervention might be warranted.

Thank you. We wish you and your loved ones well during this extraordinarily challenging time.

\* 1. Do you teach architectural history courses as the faculty of record in the United States?

- 🔵 Yes
- 🔵 No

Thank you for contributing to the SAH Data Project. We value your input tremendously. If you also teach architectural history and have not already completed the Survey for Faculty, further instructions can be found on the project's website.

Hitting "Done" now will submit your institutional data and exit the survey.
