<td>10</td>
<td>Are current Native-design oriented projects largely confined to Native-dominated spaces (i.e. Reservations, colleges with large Native student populations)? Are efforts being made to include colonially-dominated spaces in these sorts of projects? If so, what do you envision this change will look like?</td>
<td>Anonymous Attendee</td>
<td>We go through a consensus building process from the beginning and as the design develops. And we put together options on different ways to respond to and celebrate the culture. And when possible we engage tribal artists who bring their own cultural perspective on different parts of the project.</td>
<td>Daniel Glenn</td>
</tr>
<tr>
<td>11</td>
<td>Perhaps this question is mainly for Daniel, but: in your experience then what has been the main challenge in narrowing down the cultural elements characteristic for a specific cultural group? And: in your experience, how do you best start engaging with the local community?</td>
<td>Asta Mensted Randløv</td>
<td></td>
<td></td>
</tr>
<tr>
<td>12</td>
<td>What frameworks for study, research, and design are currently lacking in the field of Architecture to enhance our understanding and development of Indigenous architecture?</td>
<td>Felipe Flores</td>
<td></td>
<td></td>
</tr>
<tr>
<td>13</td>
<td>I am thankful with the emphasis by the speakers on the existential and place-based nature of this thinking and being. This requires design students (and faculty) to get beyond the technical and symbolic formal and think of the design process and lived meanings differently.</td>
<td>Anonymous Attendee</td>
<td></td>
<td></td>
</tr>
<tr>
<td>14</td>
<td>In the context of Indigenous architecture, do you believe that tribal communities should develop their own design standards that surpass the basic requirements of building codes and zoning laws?</td>
<td>Felipe Flores</td>
<td></td>
<td></td>
</tr>
<tr>
<td>15</td>
<td>Is it important to adopt a multidisciplinary approach in examining the ways in which tribes are evolving and altering their architectural styles and settlements to meet contemporary demands, all the while preserving their traditional practices and cultural identity?</td>
<td>Felipe Flores</td>

<td>Extraordinary panel, thank you so much! So many questions arise from the excellent presentations. One question I have has to do with the terms we use to describe broad epistemologies of architecture. We tend to teach “Modern” architecture as universal, even though it emerged from very local and specific places, and spread through empire and settler colonialism. Meanwhile, we tend to teach “indigenous” architecture as particular, even though for indigenous people their ways of making and building are often linked to the universe—the earth or the cosmos. How can we “flip the script” in architectural history and education? How can we both elevate indigeneity while also breaking apart the myth of Modern architecture as a universal signifier? — Joseph Heathcott, Parsons School of Design.</td>
